

Edu Loan For Undergraduate and Graduate Students

Presented by Chit Su San Hsan Aung

Overview

- An eduloan program for Burmese students who are economically disadvantaged
- This program will cover tuition fees of college and outside coaching classes (home tuition as known in Myanmar culture)
- This will cover at least 5 % to 50% of the tuition fees requested by the applicant
- A quota of 100 students will be selected annually for this program
- Students will have to repay the fees wholly before or after graduation without any interest paid

Vision: Be the most reliant independent financial-aid institution for students

Mission: To provide better financing options for aspiring students and produce industrious and innovative students for the future

Values: To be a transparent, equitable, and trustable institution for making an inclusive and well-supported community through the financial aid program of aspiring students

Background

- The Myanmar community has been most of the time deluged with NGOS, INGOS, giving either financial or social development aid for families in need.
- Only few were given little or no attention when it comes to financial support for students for their coaching class fees and tuition fees
- This has created a discrepancy in terms of financial propensity when paying school or college fees
- The immediate effect stands unbeknownst to the families of students
- Over time, students became discouraged as a result of financial shortage, alienated themselves from school/college, paying less attention to their studies and underperforming with low grades.
- Finally, students became uninterested in school studies resulting them in dropouts or resulting in repeated failed students (languishing for more than a year or so)

Purpose and Objectives of the Project

Purpose: To better provide financial aid for the needy in a timely manner and fulfill their financial needs of students with a scrutinized method of screening to confirm the best fit students.

Objectives:

1. To provide financial aid to the most fit students according to one's academic performance, community involvement, and level of empathy one has
2. Not just a financial aid but also an incubator for future project development proposed by the qualified students
3. To be an independent financial institution with zero interest charge

Literature Review

1. **A review of the literature and research:guaranteed student loan program**

Research Methods and Design

Mixed model : I will use both qualitative and quantitative type of study to get an in-depth view and details of the this proposed eduloan program

Experimental Design: In the quantitative study, I will use the experimental type of research to get more accurate figures and causes and details of the underlying project

Primary data: As this is both quantitative and qualitative, I will employ primary data by surveying with online questionnaires to find out the background problem, and the viable solutions.

Timeline

Data preparation: This includes 1 month of preparing the questionnaires.

Data collection: This will take at least 2 months.

Data analysis: This will take 3 to 4 months to break down the data into both quantitative and qualitative data.

Write-up: The write up will take at least 3 months till completion.

Revision: This final stage will take 1 month.

Total : 10 months (at least)

THANK YOU
