

P.M.C.T

Humanitarian Assistance to IDPs

Dry Zone, Middle region of Myanmar &
across its boundaries Areas

Humanitarian Assistance to IDPs

Project Summary

1. To provide humanitarian and medical aids to the displaced population caused by armed battles during the revolution period according to the Core Humanitarian Standard on Quality and Accountability.
2. To rehabilitate and implement development programs during the post revolution period in addition to the Sustainable Development Goals in order to improve the quality and accountability of assistance.

P.M.C.T Humanitarian & Medical Relief Organization.

Map 1: Dry Zone within Myanmar

Humanitarian Assistance to IDPs

Challenges

- The targeted regions are not historically known for hosting displaced people.
- The targeted regions pose more difficulties in terms of aid logistics since they are not near international land borders.
- There are no declared borders as the ethnic armed groups have and therefore it is difficult to build refugee camps.
Eg. the camps are dispersed across many villages.

Humanitarian Assistance to IDPs

Challenges

- Challenges in connecting with donors among the temporary working committee resulting disproportion between donation and needs
- Urgent needs for food, WASH, Education (Psycho social Support, Child Friendly Service), Protection (GBV, Sexual exploitation, etc.,)
- Battles are still ongoing in Karenni, dry zone, middle region of Myanmar and Ethnic regions that share borders with Myanmar middle & dry zone where the aid efforts are in place

IDPs in Karenni & Dry Zone.

Humanitarian Assistance to IDPs

Potential Solutions

- Efforts on establishing and leading a permanent committee which includes members from diverse backgrounds and also a very first unique committee amongst the humanitarian organizations of Myanmar and continuing aid distribution with the help of international community
- Field coordinators will procure items from nearest place of him/her (Being a group that includes leaders of front-line revolution forces and aid volunteers, we can enable, monitor, and report on the distribution of aid in a systematic and timely manner)
- Household data collections in accordance with the villages where clashes is being in place (we can collect systematically and precisely even when internet break-down because we are applying digital tech tools such as KoBoToolbox)

Humanitarian Assistance to IDPs

Potential Solutions

- **Promote Core Humanitarian Standards Awareness to field coordinators and Informing program recipients about the contents of protection based on the technical consultation by the consultative board and committee members who are specialized in related issues**
- **Focal persons included in committee will cooperate with the field coordinators for successful aid distributions where heavy fights, helicopter and air strikes are widening and intensifying in places**

Humanitarian Assistance to IDPs

Potential Solutions

Current Activities for Emergency Response Efforts.

Humanitarian Assistance to IDPs

Fundraising Strategy

- Donation from overseas Burmese and local business owners
- Writing a Persuasive Project Proposal, Grant Application to International Donors and Governments who are interested in Myanmar Issues

“Thank you very much for your time!”
